

CAD File Management 4.0

Manage structured CAD drawings (with XREFs) in Kronodoc

CAD file management 4.0 enables the checkout of structured CAD drawings that consist of XREF drawings in addition to the master drawing being edited / viewed.

XREF and master drawings are can be managed separately, and one XREF drawing can be assigned to multiple master drawings to remove need for duplicating XREF drawings and ease their management.

CAD file management Client requirements

- Microsoft Windows XP or Vista 32- or 64-bit
