

Kronodoc Excel Reporting 4.0

Export and import Kronodoc properties to/from excel documents.

Kronodoc Excel Reporting enables exporting of Kronodoc properties to predefined Excel templates and updating of Kronodoc properties based on contents of an Excel worksheet.

The export allows the user to create a document package (zip format) that contains also the files related to a document for distribution of properties and files to 3rd parties for importing into their content management systems.

The update feature in Kronodoc Excel Reporting allows easy mass editing of document properties in Excel sheets or updating of properties from an Excel workbook from a 3rd party system.

Supported file formats

- Microsoft Excel workbook 2000-2003 (xls)
- Microsoft Excel workbook 2007 (xlsx)
