

Kronodoc PDF Conversion 4.0

Convert Microsoft Office files stored in Kronodoc into PDFs for distribution and archival.

Kronodoc PDF Conversion enables rendering of files stored in Kronodoc to PDF automatically upon release of the document.

The conversion also supports the PDF/A format which is defined by an ISO standard and is suitable for long term archiving of documents.

Solution architecture

The solution consists of a PDF conversion server running on Microsoft Windows Server 2003. A connector for accessing the PDF conversion server is included in the Kronodoc 4.0 product suite.

Multiple PDF conversion servers can be connected to one single Kronodoc instance for increased throughput in environments with high conversion volumes.

Supported file formats

- Microsoft Word 2000 to 2007
- Microsoft Excel 2000 to 2007
- Microsoft Powerpoint 2000 to 2007
- Support for additional file formats may be available through Kronodoc services

Conversion Server System Requirements

- Min. 1Gb of memory
- Min. 1Gb of free disk space
- Microsoft Windows Server 2003
- Microsoft Office 2007

Pricing principles

- License fee for PDF conversion server and Kronodoc connector
- Yearly support and maintenance fee
