

Kronodoc 4.0 Release Event

Kronodoc 4.0 is nearing completion! We are happy to invite you and your colleagues to join the Kronodoc 4.0 Release Event. This event will take place in Helsinki in Finland on **26th of August 2008**. All our Kronodoc users with technical and management interests are welcome to join and to get informed about the latest development and meet the Kronodoc team and other users. You will receive an invitation in early August.

The screenshot displays the Kronodoc 4.0 user interface. At the top, it shows the user 'krono' and their group 'Privileged ...'. The main navigation bar includes 'Workspaces', 'Documents', 'Folders', 'What's new', 'Dashboard', and 'Document circulations'. The left sidebar shows a tree view of folders, including 'Project root folder', 'Subfolder with documents', 'Empty subfolder', 'Sandbox', 'Kronodoc Information', and 'Further References'. The main content area shows a document list for the 'Subfolder with documents'.

Kronodoc Customer Satisfaction Survey 2008

We would like to thank everybody who took part in the Kronodoc customer satisfaction survey this spring. The survey was conducted in April and May, and was sent to approximately one hundred of our customer contacts by Onway Oy.

There were a lot of good ideas, feedback and advice given by you on specific issues that we can take away from the survey, and use to help us further improve our account management, services and product development.

Gustav Paulig outsourced their main user services to Kronodoc

Gustav Paulig Ltd has outsourced their Kronodoc-related main user services to Kronodoc since the beginning of February 2008. In practice this means that a couple of named persons in Kronodoc have been assigned to take care of the tasks formerly assigned to internal main users. These tasks include e.g. training new employees, giving on-site support and personal hands-on training to existing employees, collecting end-user feedback and change requests on regular basis, taking care of the upgrades as a turn-key solution and taking care of all Kronodoc-related communication to end-users.

Does your company have similar needs for main user services? If yes, please, contact your account manager or sales@kronodoc.com for more information.

Kronodoc Day 2008

The Kronodoc Day, which has already become a tradition, was held on 28th of May. Kronodoc was delighted to have case presentations from ABB, Pohjolan Voima and Fennovoima. Kronodoc talked about the customer satisfaction survey and the properties of its new product version, Kronodoc 4.0.

All speeches inspired a great deal of interest amongst the participants. On the basis of the plentiful feedback received, we feel confident stating that the Day was useful and beneficial to all parties.

Kronodoc signs contract with ABB for global roll-out of next generation Project management & Document Control Tool

Kronodoc Oy has signed a global contract with ABB Ltd. The contract includes Kronodoc document & project control products and services delivery to implement the Kronodoc document & project control solution for project business in ABB globally.

"One of the key challenges of today's global project business is the management of on-time document flows from suppliers to the project contractor and from the project contractor to the customer and officials. On-time document flows play a key role. They

trigger procurement, manufacturing and billing milestones in networked projects. Hence they represent a key driver for improving delivery accuracy and operational efficiency in project business.", summarizes Rainer Puitinen, Managing Director, Kronodoc Oy.

"We have been improving document control in the project business for several years. Until we came across Kronodoc we have had to build software tools to control document flows in delivery projects. With Kronodoc we can replace our custom solutions with an off-the-shelf product that further ties together architecture and processes, to further substantially cut IT-, process- and QA costs through efficient information management. It allows us to drastically cut down on IT costs. Development, maintenance, deployment and support costs of the document control solutions are reduced drastically. At the same time the business benefits are maximized by controlling key information flows in delivery projects.", says John Haugstad, Implementation Manager, ABB.

The Kronodoc document control solution is integrated to our Enterprise Content Management architecture that is based on EMC Documentum and thereby seamlessly integrates to our corporate IT infrastructure. Kronodoc allows us to provide project business with the document control tools that we need to drive an even more efficient global operation. Documents drive the business.", concludes Jorn Ostbye, Group Vice President, Process Automation Centers of Excellence."

Pohjolan Voima's Kronodoc use expands to Porin Prosessivoima

Porin Prosessivoima Oy, a subsidiary of Pohjolan Voima Oy, starts using Kronodoc. Porin Prosessivoima has chosen Kronodoc for their administrative document management, and for the plant document management in both the existing power plant and the new bio power plant, the construction of which is due to be completed in 2008. Kronodoc implementation will take place in 2008, and in conjunction a maintenance and material management system, Arttu, will also be taken into use with Kronodoc integrated to this.

Porin Prosessivoima Oy was established in 2005, and its bio power plant will continue Pohjolan Voima's biofuel program with the objective of increasing the use of renewable energy.

New Kronodoc Office Integration released

Kronodoc has released a new version of Office Integration (11.0.3). The new release is compatible with Kameleon to Kronodoc integration. The release also contains new features related to MS Office file formats, and to MS Outlook. With the new release it is possible to force MS Office 2007 file formats into Office 2003 file formats when uploading files to Kronodoc. It also enables the use of an Office Integration -like “Send to Kronodoc” menu in Outlook.

To get more information and to avail of the new Office Integration release please contact Kronodoc Support (support@kronodoc.com) or download the installation package and release notes on the Kronodoc Support installation:
